

## Overview

The purpose of this notification is to announce the availability of the new Firmware Version 1.0 for the RESI DVB-C Modulators. The new Firmware is developed to work on the new Hardware Version FSM V5 as well as on the prior Hardware Version FSM. The following RESI DVB-C Modulator family members with 4 / 8 / 16 / 24 Transponder are supported:

FSM 8 – 4 Transponder only – article N# 093042	FSM 4 V5 – article N# 193042
FSM 8 – article N# 093002	FSM 8 V5 – article N# 193002
FSM 16 – article N# 093003	FSM 16 V5 – article N# 193003
FSM 24 – article N# 093004	FSM 24 V5 – article N# 193004

## Description

Digital Devices continuously strives to provide improvements and optimization to all products.

- **Improvements**
  - Hardware changes in FSM V5: new output amplifier for higher output power, less skew and higher frequency, *FSM V5 only*
  - API changes for more flexible frequency plan, *FSM V5 and FSM*
  - New 6/7MHz support, *FSM V5 and FSM*
  - PCIe Core update, *FSM V5 and FSM*
  - Increased driver strength for PCIe, *FSM V5 and FSM*

## Download and Contact
